

ANTI-MICROBIAL SURFACE COATING FOR DEVICES

WHAT IS AN ANTIMICROBIAL SURFACE COATING?

Antimicrobial surface coatings are for continuous protection against bacteria, viruses, mold, and fungi for a cleaner, healthier environment. We apply our transparent, long-lasting, non-toxic coating to any surface for ongoing protection against dangerous pathogens.

HELPING YOU DO MORE

The treatment keeps device surfaces clean in between more rigorous cleanings by trapping and oxidizing bacteria and other volatile organic compounds (VOCs) that cause the spread of infections. This ensures that your staff and patients are protected at all times.

24/7

protection from
VOCs and other
microbes.

Lasts up to

2 yrs.

Coating
covers

100%

of the unit's
surface
