MICROSOFT AZURE: POWERFUL CLOUD COMPUTING

WHAT IS IT?

As the business landscape continues to evolve and virtually all industries face new challenges from disruptive competitors, companies are forced to adapt and in some cases re-invent themselves. Microsoft Azure is a highly-scalable, powerful, on-demand cloud computing platform that helps companies operate differently in today's modern business world. The Azure platform helps organizations store and manage data, create complex web applications, improve cybersecurity and more. Azure consists of 60+ global datacenters and more than 660 products and services—all designed to support modern business functions, and help them make better, data-driven decisions.

**YOU MAY ALREADY BE USING AZURE WITHOUT EVEN KNOWING IT.
MICROSOFT 365 PRODUCTS RUN FROM AZURE DATACENTERS.**

WHY AZURE?

When it's time to find solutions to achieve your business objectives, Azure allows you to build on a platform that you can trust, that will grow with you, and that provides the flexibility to design a solution around your specific capabilities and business goals.

AZURE DELIVERS VALUE IN FOUR KEY AREAS:

- **Be future ready:** Capabilities you need today but more added continuously to meet your needs tomorrow and beyond.
- **Build on your terms:** Developers can build with the frameworks, languages, tools, and Open Source software they are most comfortable with.
- **Operate hybrid seamlessly:** Seamlessly operate technology on-premises, in the cloud, and sitting on Edge devices.
- **Trust your cloud:** Build and deploy on a platform you can trust, that is secure and compliant.

FULLYMANAGED
CREATING PEACE OF MIND

Fully Managed is a leader in digital business transformation. As a ServiceNow Elite partner, we enable organizations to navigate and excel in the digital-first work world. Our mission is Creating Peace of Mind through better IT, customer and employee experiences to make work flow!

fullymanaged.com

AZURE IS DESIGNED TO HELP BUSINESSES BE FUTURE-READY AND DIGITALLY TRANSFORM HOW THEY OPERATE

- 60+ datacenters (regions) around the world
- Hyper-scalable and redundant
- No hardware to manage
- Lower operating costs (pay for only what you need)
- Fully scalable with the ebbs and flows of your business
- No commitments unless you lock in your term (for an additional discount)
- Go hybrid or go full cloud
- Keep your data in a specific country or geo-locate it to be closer to your employees and/or customers for a better experience
- Pay for only what you use when you use it

CYBERSECURITY IS A KEY PRIORITY WITH AZURE

Microsoft has the highest number of compliance certifications than any other public cloud platform.

INVESTMENT + INNOVATION

Microsoft's dedication is the reason why businesses of all types, government and 95% of Fortune 500 companies choose to operate their businesses on Azure.
