# PHISHING TESTING & CYBERSECURITY TRAINING

## WHAT IS IT?

Fully Managed Phishing Testing & Cybersecurity Training empowers your employees with the knowledge and skills to stay cybersecure at work and home. With phishing simulations and hundreds of awareness and training resources, you'll have everything you need to prepare employees to detect, report and defeat cybercrime, all while reducing risk for your organization.

## WHAT'S INCLUDED?

### Security Awareness & Anti-Phishing Training

Every organization — and every employee — is susceptible to phishing emails. This makes simulating a wide variety of phishing attack types crucial. Phishing Testing & Cybersecurity Training is designed to help you stay compliant with security awareness and training requirements, and inspire effective employee security habits. Keep employees engaged and deliver personalized education on key topics to your entire workforce:

- Phishing
- Password Security
- Safe Web Browsing
- Social Engineering
- Mobile Security

- Malware
- Physical Security
- Removable Media
- Working Remotely

## SOLUTION BENEFITS

1. **Turn phishing clicks into teachable moments:** Deliver training the moment your employee clicks a simulated phishing link. Highlight phishing red flags or share educational modules that deliver training in the teachable moment and reinforce good security habits.
2. **Simulate the most sophisticated attacks:** Prepare your employees for the most challenging threats they will face by simulating the same spoofing techniques, typosquatting/URL hijacking and other common attack techniques scammers use.
3. **Suspicious email reporting and automated analysis:** Enable employees to report suspicious emails with the Phishing notification options, and automatically analyze employee-reported emails to quickly detect threats and orchestrate attack response.

**FULLYMANAGED**
CREATING PEACE OF MIND
